Engine bearings (NDC metal)

We faithfully produce standard bearing designs for each automobile manufacturer.

This is a genuine equivalent product with sufficient quality control.

Standard grade, ideal for overhauling city vehicles, WPC Molybdenum treatment can be applied to increase strength.

- *Metal size types
- Standard size (STD)
- Undersize (0.25/0.50/0.75/1.00)

Note

- If the main metal with thrust is undersized, the thrust side will also be undersized.
 - For undersized crank grinding dimensions, adjust the oil clearance.
- Please contact us if you need to make such a request.
