

## DR30 radiator rubber hose (genuine type)

We commissioned a major domestic manufacturer to manufacture the hose, and started from scratch with a new mold. This is a high-performance hose that is stronger than the original while retaining the original appearance.

- Upper hose ¥3,500
- Lower hose ¥3,500

\*Early and late NA turbo compatible type

## DR30 Turbo Blow-by Hose Set (Genuine Type)

Due to the discontinuation of the OEM product, this is a high-grade reproduction made with a new mold. Unlike the OEM rubber tube, a reinforcing layer has been added inside the rubber to prevent cracking and to withstand high boost, allowing for safe use over a long period of time.

•2 Set ¥9,000

## DR30 heater hose set (genuine type)

We have reproduced a heater hose that was discontinued by Nissan. The product is designed to the exact same specifications as the original, and even the protectors at some of the bends are reproduced exactly like the original.

•2 Set ¥4,800

## DR30 Water Hose Set (Under Throttle)

We have reproduced this water hose for users who are in trouble because the manufacturer has discontinued production. In addition to the three-layer structure that is excellent in heat resistance, pressure resistance, and water resistance, the 3.5mm thick design ensures safe and secure strength.

•2 Set ¥4,800

\*This is a water hose that is attached to the underside of the throttle.

## DR30 Air Regulator Hose Set (GenuineType)

We have reproduced the air regulator hose that was discontinued by Nissan. We designed the product to the exact same specifications as the genuine product, and even reproduced the protectors at some of the bends exactly like the genuine product.

•2 Set ¥5,200

## DR30 Water bypass hose (in front of head)

This water hose has a 4.0mm thick rubber central section with a nylon reinforcing layer for enhanced heat and pressure resistance.

•1 bottle ¥1,800

\* Equivalent to genuine part number 21018-R2000

## DR30 Bosch Fuel Pump (Genuine Replacement)

This is a Bosch fuel pump that can be installed without any modifications as a replacement for the DR30 genuine pump.

more capacity type that can be used from normal to semi-tuned.  
(No fuel adjustment required after replacement)

Price: ¥39,000

\*Dimensions:  
Inlet diameter 12q, outlet diameter 8q (90 degree orientation),  
body diameter 52q, total length 190mm

## DR30 U-shaped fuel hose (genuine type)

We have reproduced the IN side hose of the fuel pump, which was no longer manufactured. The inner diameter of the hose on the pump side is thicker and is a different diameter size, so it is an important part that cannot be substituted. If you have not replaced the hose for years, we recommend replacing it before gasoline leaks from cracks in the hose.

\* Compatible with HR30, equivalent to genuine part number 17557-04500

•1 bottle: ¥3,200

## DR30 fuel filter

Price: ¥6,070

Part number: 16400-0W010 Compatible  
with: FJ20 injection vehicles Body diameter: 56j

## DR30 Fuel pump out hose (genuine type)

Following the U-shaped hose, we have reprinted the OUT side hose of the fuel pump, which had been discontinued. It is an important part that is difficult to substitute because it is difficult to bend and requires high pressure and gasoline resistance. We recommend replacing it at the same time as the U-shaped hose before gasoline leaks from cracks in the hose.

\* Compatible with HR30, equivalent to genuine part number 17556-04500

•1 bottle: ¥4,300

## DR30 Fuel Tank Hose

A reissue of a fuel tank hose that Nissan has already discontinued. We have faithfully reproduced the original shape and created a new mold from scratch. The high-quality finish ensures a worry-free installation.

Nissan Part Number:17228-01L01 Equivalent

Price : ¥11,000  
(New Product Added 2026.6.15)
