

SR311 U20 DENSO PARTS

U20 Black Alternator (80A)

"Lightweight + low resistance" high performance type!
 Type: IC built-in type
 *IC harness required (sold separately)
 *Warranty period: 2 years

Price: ¥60,000 (for right-hand drive vehicles)
(Updated 2025.12.30)

*Due to the characteristics of the vehicle, modifications may be required for installation.

U20 High Power Alternator (65A)

Type: Built-in IC type
 *Requires IC harness (sold separately)
 Rebuilt product (no need to return core)
 *Warranty period: 1 year

Price: ¥40,000 (for right-hand drive vehicles)
 ¥43,500 (for left-hand drive vehicles)
(Updated 2025.12.30)

*Due to the characteristics of the vehicle, modifications may be required for installation.

U20 Infrared Full Track Kit

This infrared full-transistor kit was specially ordered from Lumention, a prestigious manufacturer of ignition systems in the UK. It significantly improves engine starting and is a high-energy built-in type that provides a strong spark over a wide range from low to high speeds.

Price: ¥60,000/kit

SR311 IC harness kit

This harness kit is used when changing an old dynamo to an alternator with built-in IC. It is a bolt-on type that can supply a safe and stable voltage thanks to its moderate resistance and reverse current prevention diode.

Price ¥5,500

*For cars with ammeter

ignition coil

*Maximum output 45000v 0.6Ω

(Black coil) (Chrome coil)

Compatible with all ignition systems such as points, full-transistor, CDI, MDI, etc. It is best matched with infrared full-transistor kits and MDI, and can significantly improve spark.

Price:
 Chrome coil ¥19,000
 Classic black coil ¥19,000

*Resistors sold separately are required for point vehicles.

U20 Planetary Gear Starter

Type: Planetary gear type
 Part number: NLU14

Rebuilt product (no trade-in required)
 *Warranty period: 6 months

Price: ¥40,500
(Updated 2025.12.30)

U20 Disk Cap & Rotor Set

A part that distributes the ignition energy generated from the ignition coil to the spark plug without waste. When the electrode wears out, it needs to be replaced.

Compatible with: SR311 (U20 / 2000cc)

Price: ¥9,500/set
(Updated 2025.12.23)

U20 Low resistance plug wire (Kameari specification)

Compatible with all ignition devices, including points, full transistors, and MDI ignition. This plug wire is designed for Kameari use and reduces resistance to prevent ignition loss and reduce heat generation.

Compatible with: SR311 (U20 / 2000cc)
 Color: Red / Gray

Price: Right-hand drive car ¥30,700
 Left-hand drive car ¥30,700

*The image is for right-hand drive vehicles.

*Gray codes will end as soon as stock runs out.
