SOLEX main jet types and differences
 SOLEX main jets are available in Mikuni and Kameari versions.
 Please note that even if the numbers are the same, the hole diameters are different.
 In the case of #165 made in Kameari, the same hole is made as the 1.65mm number.
 The Mikuni #165 has a 1.77mm hole, which is about 7% smaller than the number.
 The holes will become larger. Therefore, do not mix Mikuni and Kameari products.
 Please be careful not to mix up the two products.
 If no preference is given, we will provide Kameari products.
 Regarding the air jet, both the Mikuni and Kameari models have the same hole diameter.
 So there is no need to worry about the main jet.
